

### **Science Club's Trip to Mark Rutherford School**

Science Club went on a trip to Mark Rutherford School. It was quite a long walk and very sunny.

When we arrived we went to a science lab. In the science lab we looked at plant and animal cells. To look at plant cells we got a slide and a piece of onion, we peeled a thin layer from the onion, and poured some red liquid onto the onion skin.

After that we had a snack then we went into a planetarium and we looked at more cells. Then we went back to school
